What We Do

We create a large number of our products completely from raw materials at our facility in Mobile, Alabama. We operate a full cut and sew facility. We try and source as many of our raw materials from right here in the US but, that is not always possible.

Direct Fulfillment

Our direct fulfillment program was created to assist our retailers in creating an endless aisle. Our catalog is currently over 250,000 skus and can be curated to fit your current category offering.

Over 250,000 skus
